1. How C&C Trading works

C&C Trading copies the trades of a professional master account to your own MetaTrader account, automatically. When the master opens, changes or closes a trade, your account does the same within a few seconds.

It works in three parts:

- **The website** (ccsocialtrading.com) is where you manage your accounts, choose how your lots are sized and pay your subscription.
- **The C&C Slave EA** is a small program you attach to one chart in your MT4 or MT5 terminal. It receives the trades and places them on your account.
- **Your copy token** links the EA to your account on the website. You never share your MetaTrader password with us.

> **Your safety comes first**
> Every trade is checked on our server before it reaches your terminal. Your lot size is kept inside the range for your account balance, so a small account can never take an oversized position.

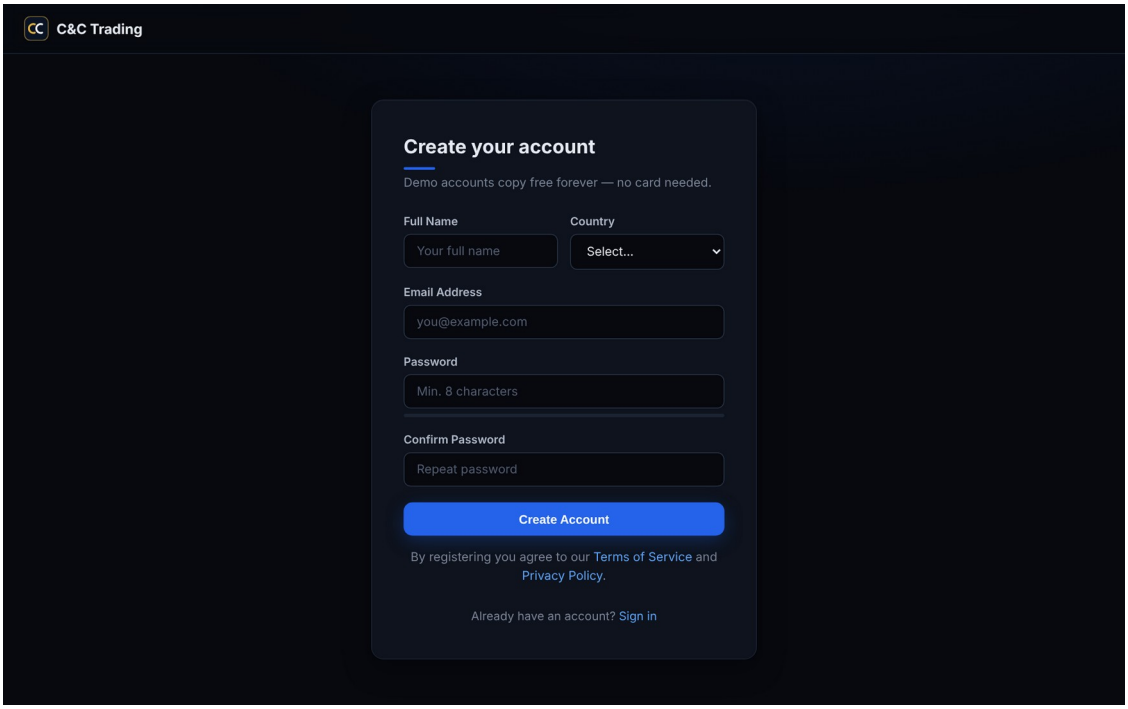

2. What you need

- A MetaTrader 4 or MetaTrader 5 account with any broker (demo or real).
- A Windows computer or a Windows VPS that stays on while you want to copy. The EA only copies while your terminal is open and connected. For copying 24/5 we recommend a VPS.
- An email address for your C&C Trading login.
- For real accounts: crypto to pay the monthly subscription (for example USDT).

> **Try it free first**
> Demo accounts copy for free with no time limit. We recommend testing on a demo account with your broker before you connect a real account.

3. Create your account

1. Go to **ccsocialtrading.com** and click **Get started**.
2. Enter your full name, country, email address and a password of at least 8 characters.
3. Click **Create Account**. You are signed in and taken to your dashboard.

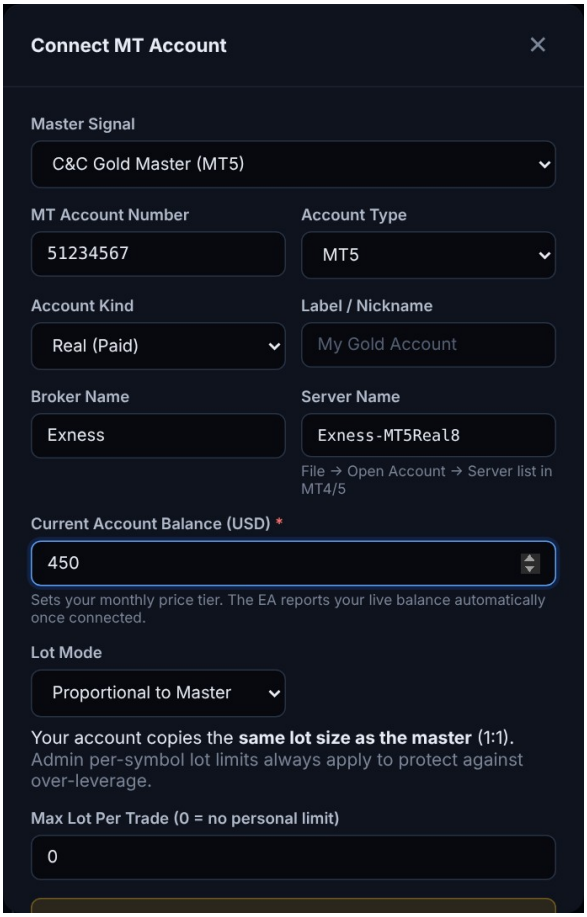

The registration page

Next time, sign in with **Login** on the website. If you forget your password, use **Forgot password?** on the login page.

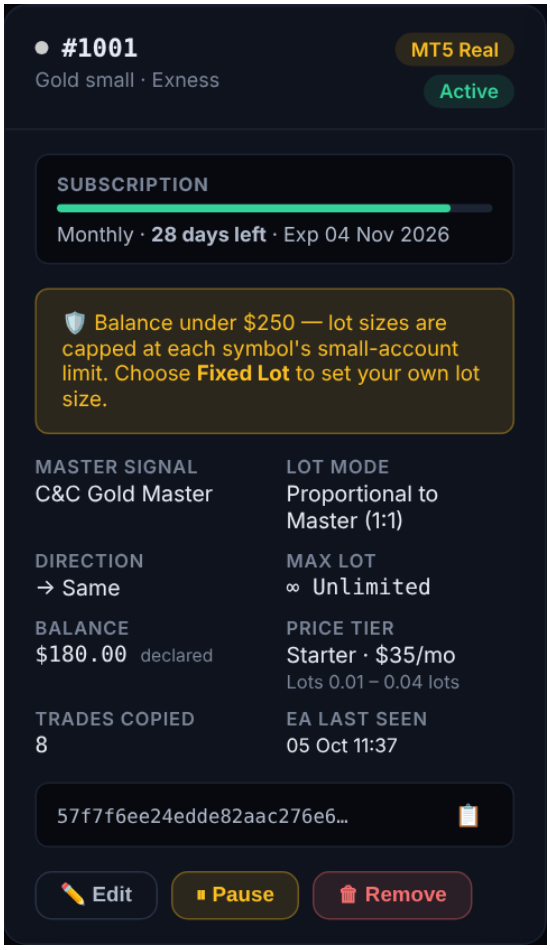

4. Connect your MT4/MT5 account

Each MetaTrader account you want to copy to is added separately. Every account gets its own copy token and its own lot settings.

1. In the dashboard menu, open **My Accounts** and click **+ Connect Account**.
2. **Master Signal:** choose the signal you want to copy. Pick one on the same platform as your account (MT4 or MT5).
3. **MT Account Number** and **Account Type** (MT4 or MT5): exactly as in your terminal.
4. **Account Kind:** Demo (free) or Real (paid).
5. **Broker Name** and **Server Name**: you find the server in MetaTrader under File > Open an Account, or on the login window.
6. **Current Account Balance (USD):** your balance today. This sets your price and lot range. Once the EA is running it reports your live balance automatically.
7. **Lot Mode:** how your lots are calculated (see section 5). If unsure, keep **Proportional to Master**.
8. Click **Connect Account**. Your account appears as a card with its **copy token**.

Connecting an account

Your account card with its copy token

Click the clipboard icon next to the token to copy it. You will paste it into the EA in section 7. **Keep your token private** — anyone with it can receive copies on their terminal under your subscription.

5. Lot sizes and your balance tier

Lot modes

Lot mode	How it works	Example (master opens 0.20)
Proportional to Master	Your account opens the same lot size as the master.	0.20
Multiplier	Master lot × the multiplier you set.	Multiplier 0.5 → 0.10
Fixed Lot	Every copied trade uses the lot size you set, whatever the master trades.	Fixed 0.03 → 0.03

Price and lot range by account balance

Your account balance decides your monthly price and the lot range you can copy. Every copied trade is kept inside this range, whatever lot mode you choose: a master lot that is too big is reduced to your maximum, and one that is too small is raised to your minimum.

Account balance	Price per month	Lots per trade
Up to $500	$35	0.01 – 0.04
$501 – $1,000	$45	0.06 – 0.16
$1,001 – $25,000	$55	0.16 – 0.25
$25,001 – $50,000	$100	0.25 – 0.32

Prices and ranges shown on the website's Plans page are always the current ones.

Extra protection

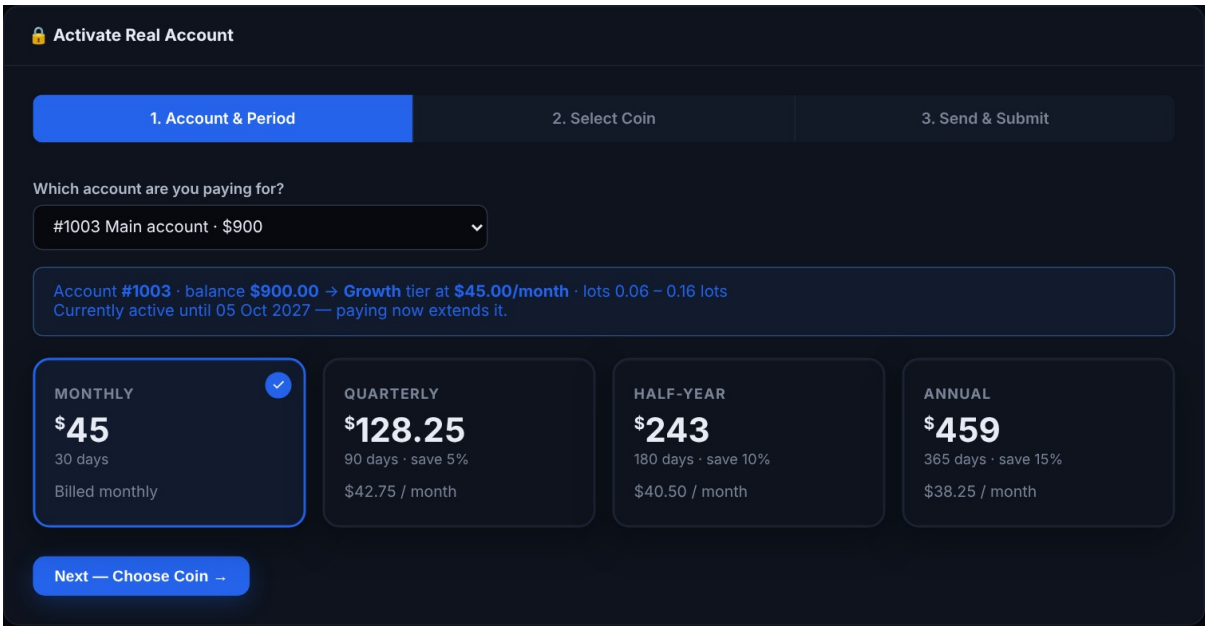

- Each symbol (for example EURUSD) also has a maximum lot set by our team.
- Accounts under $250 that are not on Fixed Lot are held to a small-account lot size on each symbol.
- You can also set your own Max Lot Per Trade when you connect or edit an account.

> **Why was my lot different from the master's?**
> One of the limits above applied. In Trade History, a shield icon next to the lot shows the trade was adjusted. Hover over it to see exactly which limit was used.

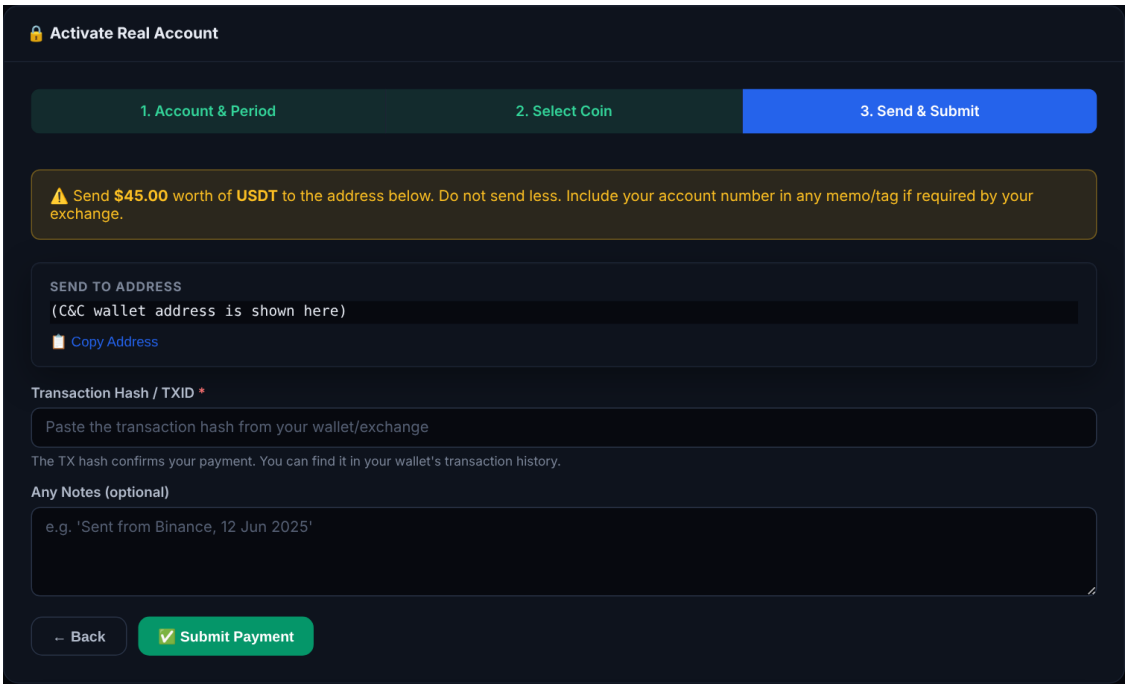

6. Subscribe (real accounts)

Demo accounts copy free. A real account starts copying once its subscription is active. Each real account has its own subscription.

1. Open **Payments** in the menu.
2. **Account & Period:** choose your real account. The page shows your balance, tier and monthly price. Then pick a billing period. Longer periods are cheaper: Quarterly saves 5%, Half-Year 10%, Annual 15%.
3. **Select Coin:** choose the cryptocurrency and network you will pay with, for example USDT on TRC-20.
4. **Send & Submit:** send exactly the amount shown to the wallet address shown (use **Copy Address**). Make sure the network in your wallet matches the one you selected.
5. Paste the **transaction hash (TXID)** from your wallet or exchange and click **Submit Payment**.

Step 1: the price is calculated from your account's balance

Step 3: send the amount, then paste the transaction hash

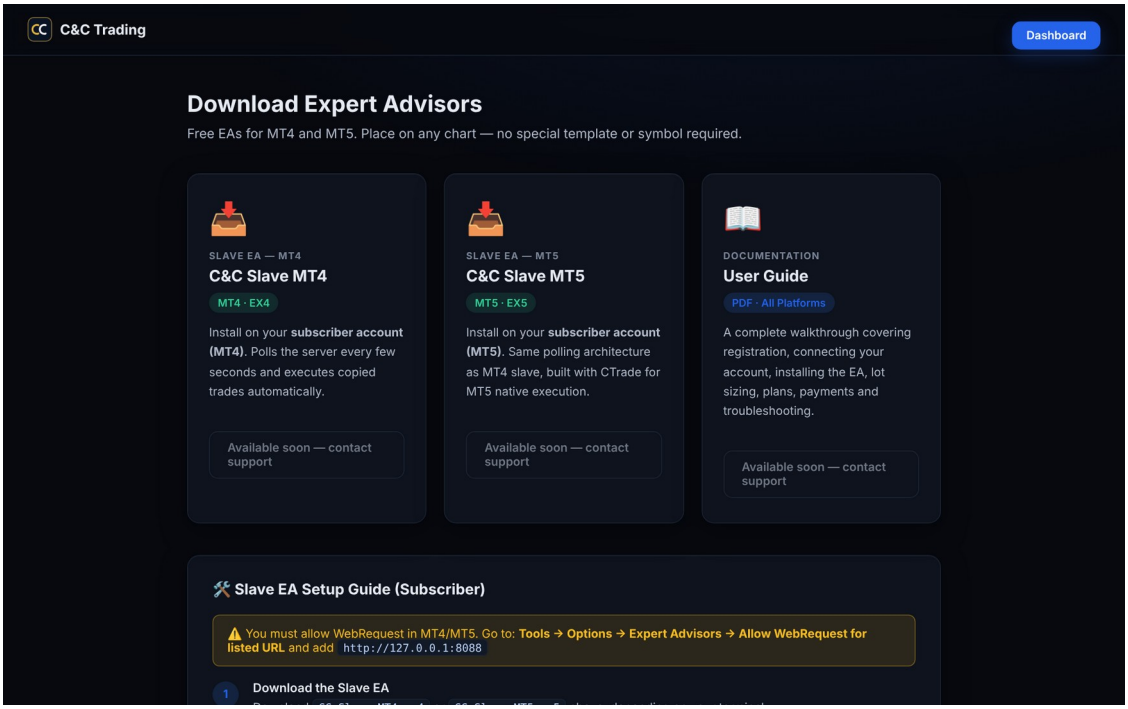

We confirm payments within 1–2 hours. Your account card then shows the subscription and days left, and copying starts automatically. Paying again before expiry adds the new period to your current one.

> **Sending crypto**
> Always double-check the network (for example TRC-20 vs BEP-20). Funds sent on the wrong network may be lost. If your exchange asks for a memo or tag, enter your MT account number.

7. Install the C&C Slave EA

7.1 Download

On the website open **Download EA** and download **CC_Slave_MT4.ex4** (for MetaTrader 4) or **CC_Slave_MT5.ex5** (for MetaTrader 5).

The Download EA page

7.2 Copy it into MetaTrader

1. In MetaTrader click **File > Open Data Folder**.
2. Open **MQL4 > Experts** (MT4) or **MQL5 > Experts** (MT5) and paste the EA file there.
3. Back in MetaTrader, right-click **Expert Advisors** in the Navigator window and click **Refresh**. "CC_Slave_MT4" or "CC_Slave_MT5" appears.

7.3 Allow the EA to reach our website (required)

1. Click **Tools > Options > Expert Advisors**.
2. Tick **Allow algorithmic trading** (MT5) / **Allow automated trading** (MT4).
3. Tick **Allow WebRequest for listed URL**, double-click the empty line and type: **https://ccsocialtrading.com**
4. Click **OK**.

> **Most common problem**
>
> If this address is missing, the EA cannot connect and shows a message asking you to allow WebRequest. Type it exactly: https://ccsocialtrading.com

7.4 Attach the EA to a chart

1. Open any one chart, for example EURUSD H1. The symbol does not matter — the EA copies all symbols.
2. Drag **CC_Slave_MT4 / CC_Slave_MT5** from the Navigator onto the chart.
3. On the **Common** tab, tick **Allow live trading** (MT4) or **Allow Algo Trading** (MT5).
4. On the **Inputs** tab, paste your copy token into **CopyToken**. Leave ServerBase as https://ccsocialtrading.com.
5. Click **OK** and make sure the **AutoTrading / Algo Trading** button on the toolbar is green.

EA inputs

Input	Default	What it does
CopyToken	(empty)	Your copy token from My Accounts. Required.
ServerBase	https://ccsocialtrading.com	Our server. Do not change.
PollSeconds	2	How often the EA checks for new trades.
Slippage	20	Maximum price slippage in points for market orders.
MagicNumber	77001 / 77002	Tag on copied trades. Change only if another EA uses the same number.
UseMasterComment	false	Keep off. Trades are tagged “CC#ticket” so the EA can find them after a restart.
SymbolOverrides	(empty)	Only if a symbol is not found. Example: XAUUSD=GOLD.pro
ShowPanel	true	Shows the status panel on the chart.

> **Important**
> Attach the EA to ONE chart only, per MetaTrader account. Do not close or change the trades the EA opens by hand — the copier manages them for you.

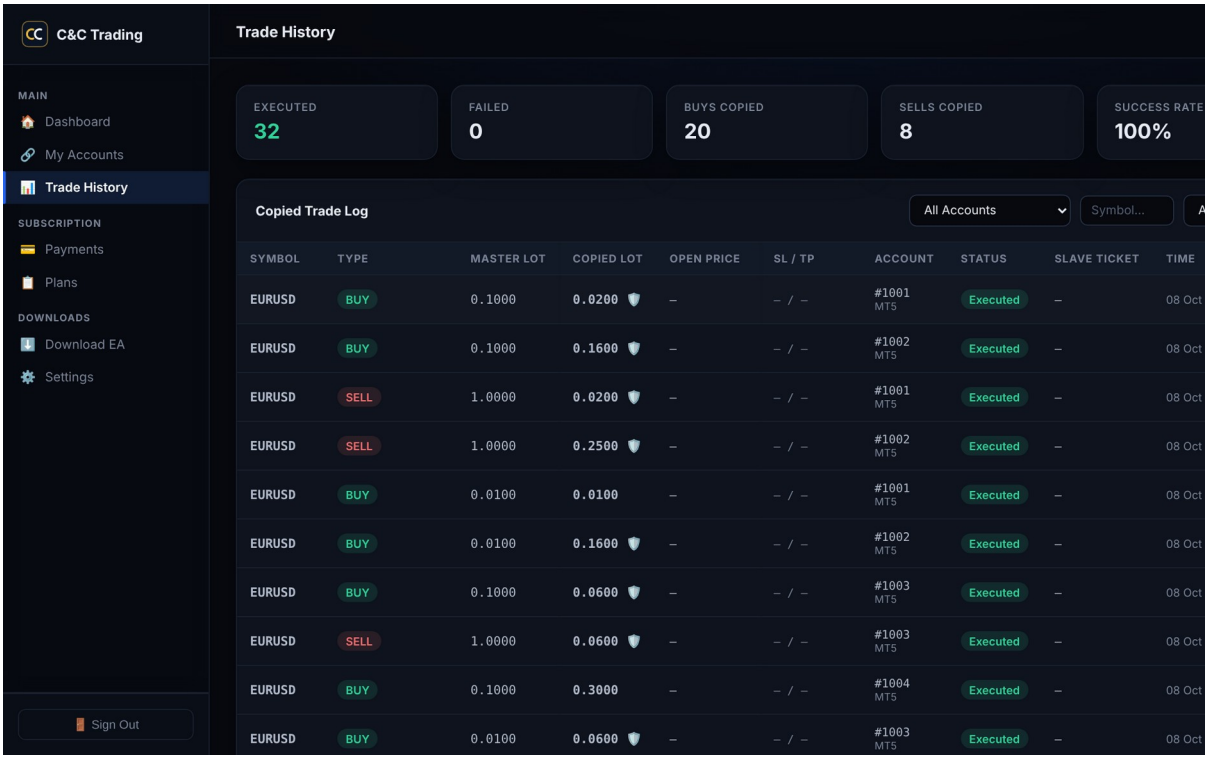

8. Check that copying works

When the EA starts, a panel appears in the top-left corner of the chart:

Panel line	Meaning
Status	Copying (green) = connected and active. Stopped (red) = see the message at the bottom of the panel.
Account	DEMO or REAL and the master signal you copy.
Lot mode	The lot mode set on the website.
Lot range	Smallest and largest lot your account can copy, and your tier.
Copied	Trades copied since the EA started, and any errors.
Last trade	The last trade the EA handled, with the time.
Subscription	Expiry date and days left (real accounts), or Free (demo).

In MetaTrader's **Experts** tab you will see a line like "[C&C Slave] v3.00 started". On the website, your account card shows the EA as **Online**.

Every copied trade is listed under **Trade History** on the website, with the master lot, your lot and the result.

Trade History: the shield icon marks a trade whose lot was adjusted

9. Managing your accounts

- **Pause / Resume:** on the account card. While paused, new master trades are not copied. Trades already open stay open.
- **Edit:** change the label, lot mode, multiplier or fixed lot, your max lot, balance, or copy direction (Same, or Reverse to trade opposite the master).
- **Remove:** deletes the account and its copied-trade history from the website. Remove the EA from your chart as well.
- **Renew:** pay again on the Payments page before expiry. You receive a reminder email 3 days before it ends. When a subscription expires, copying stops until you renew.
- **Balance grows:** your tier follows the balance the EA reports, so your lot range and renewal price move up with your account.
- **Settings:** update your name, password and Telegram username.

10. Troubleshooting

What you see	What to do
“Allow WebRequest for https://ccsocialtrading.com”	Add https://ccsocialtrading.com in Tools > Options > Expert Advisors (section 7.3).
EA shows “Token rejected” or “Invalid copy token”	Copy the token again from My Accounts and paste it into CopyToken with no spaces.
“Subscription required” / “has expired”	Pay or renew on the Payments page. Copying starts again automatically after confirmation.
“Copying is paused”	Click Resume on the account card.
Status Stopped, “Reconnecting in …s”	Your internet or VPS lost connection. The EA retries by itself.
Trade skipped: “Symbol … not found”	Your broker uses a different name. Set SymbolOverrides, e.g. XAUUSD=GOLD or EURUSD=EURUSD.pro
Trade skipped: “Broker minimum lot … is above your allowed lot”	Your broker’s minimum lot is bigger than your tier allows. Use an account type with 0.01 minimum lots.
No trades copied, panel shows Copying	The master may simply not have traded yet. Check that AutoTrading / Algo Trading is green and the EA has a smiley/active icon.
Trades stop when you turn off your PC	The EA only works while MetaTrader is running. Use a VPS for 24/5 copying.
Lot differs from the master’s	Your balance tier, a symbol limit or your own max lot applied (section 5). Hover the shield in Trade History.

11. Frequently asked questions

Does the EA need my MetaTrader password?

No. You only paste your copy token into the EA. Your password never leaves your terminal.

Is demo copying really free?

Yes, with no time limit.

Can I copy to more than one account?

Yes. Connect each account under My Accounts. Each real account has its own subscription and its own EA on its own terminal.

Can I use MT4 and MT5 together?

Yes. Choose a master signal on the same platform as your account, and use the matching EA.

What happens if my terminal was off when the master closed a trade?

The EA picks up the close when it reconnects, as long as the copy is still waiting. Keep the terminal running (VPS recommended) to avoid missing trades.

Does the EA copy stop loss and take profit?

Yes, including every later change to them, plus pending orders and partial closes.

How fast is copying?

Usually 1–3 seconds after the master's trade, depending on your internet and broker.

Can I close a copied trade myself?

You can, but the copier will then not manage that trade any more. We recommend letting the copier close trades with the master.

12. Getting help

If something is not working, send us your MT account number, a screenshot of the EA panel and the last lines from the Experts tab.

- **Website:** ccsocialtrading.com
- **Telegram:** @Cliffs10

Risk warning: trading forex and CFDs carries a high level of risk and may not be suitable for everyone. Past performance of the master account does not guarantee future results. Only trade with money you can afford to lose.
